### **DETAILED ACTION**

Page 2

#### Election/Restrictions

1. Claim 7 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 12/2/2004.

#### Specification

1. The disclosure is objected to because of the following informalities: on p. 16, II. 6, 7, 10, 21, in claim 6, II. 9 and 12, and in claim 8, II. 10 and 16 "heater exchanger" is believed to be an error for - - heat exchanger --.

Appropriate correction is required, at these and all other locations where said error occurs.

## Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claim 8 recites the limitation "said air" in line 15. There is insufficient antecedent basis for this limitation in the claim. Note that different "air"-s are recited twice in the claim, first in line 3, and then in line 13, and it is impossible even to guess to which one of the "air"-s the said air is referring.
- 4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Application/Control Number: 10/659,375

Art Unit: 3746

5. Claims 6 and 8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. At issue is the purpose and operation of the claimed by-pass system. In the specification, p. 16, l. 2 et seq., it is taught "When the bypass system 9 is used, temperature of cooling air supplied to the high temperature section of the turbine is adjusted by mixing between high-temperature cooling air and low temperature cooling air at the heater exchanger outlet without using heater exchanger 4." To a first approximation, if the heat exchanger is not operated, then the temperatures of the thru air and by-pass air are going to be equal. In a more refined way, one may argue that without operating the heat exchanger, the air going thru the heat exchanger will be warmer than the air bypassing it, because of friction heating inside the apparatus. In any case, as disclosed the invention is not enabled because without operating the heat

Page 3

## Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

exchanger, the thru air is not going to cooler.

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Uematsu 6367242, as understood published in Japan no later than May 26, 1999

Application/Control Number: 10/659,375

Art Unit: 3746

Page 4

(Japanese application no. 9-324565). Uematsu teaches the invention as disclosed and as claimed: a gas turbine 1, 2, 3, wherein part of the compressor 2 air that cools turbine 1 is cooled by temperature adjuster 5, said temperature adjuster having a by-pass 15 to the go-thru pipe 16, the mixing step being taught on col. 7, I. 48-53.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ehud Gartenberg whose telephone number is 571 272 4828. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571 272 4834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
